

TECHNOLOGY LEADERS PROGRAMME

OVERVIEW

This programme is focused on deepening strategic leadership and business acumen skills for technology leaders to advance into C-suite and senior leadership roles.

In particular, the programme provides a deep-dive and practitioner focus on four critical leadership disciplines – covering strategy, innovation, financial, and influence. It will expose participants to strategic challenges, complexities, and uncertainties through real-world case studies and business simulations that emphasise the application of frameworks and tools to solve.

Participants will have opportunities to engage senior business leaders to generate new business models and innovative solutions to create value in support of strategic objectives.

WHAT TO EXPECT

- ✓ Develop new perspectives and insights as a strategic business leader
- ✓ Develop a future orientation to think strategically and innovate business models through technology and transformation
- ✓ Develop your personal leadership influence and stature by gaining mastery in communication, marketing, change transformation, and stakeholder management
- ✓ Reflect on your own leadership journey to reframe your professional aspirations and development as an authentic, credible, and innovative technology leader.

WHO SHOULD ATTEND

- ✓ Senior tech leaders with at least 10 years of experience in technology related roles
- ✓ Tech leaders who are looking to amplify their leadership and influence at the C-suite level
- ✓ Participants could include heads of Technology, Digitalisation, Data Science & Analytics, AI, Software Engineering, Infrastructure, Quality and Risk, and Cybersecurity

PROGRAMME INVESTMENT

SGD 9,600 (excluding GST)
